Education

Vellore Institute of Technology

Master of Science in Data Science

Aug. 2021 – July 2023

Andhra Pradesh, India

Jamia Hamdard University

Bachelor of Computer Applications (BCA)

2018 – 2021

New Delhi, India

Relevant Coursework

- Data Structures
- Database Management
- Deep Learning
- Cloud Computing
- Software Methodology
- Artificial Intelligence
- NLP
- Big Data Analytics
- Algorithms Analysis
- Machine Learning
- Computer Vision
- Data Analytics

Experience

NuMinds AI

Data Scientist

October 2024 – December 2024

Dubai, UAE

- Developed conversational AI Agents using ODBC databases, enabling natural language queries and responses through SQLDatabaseToolkit and LangChain functions and create visualizations.
- Integrated Stable Diffusion for generating high-quality synthetic images based on text inputs, enabling enhanced visual content generation for various applications.

Jupiter AI Labs

Machine Learning Engineer

June 2024 – October 2024

Noida, Uttar Pradesh

- Developed models for audio-to-text classification and voice sentiment analysis, enhancing speech recognition and emotional detection from voice inputs.
- Contributed to a US healthcare project using Large Language Models (LLMs) for data insertion, updates, and retrieval, improving data processing efficiency.

Globtler Infotech Pvt Ltd

Jr. AI Developer

February 2023 – June 2024

Noida, Uttar Pradesh

- Developed an AI Agent for Data conversation, Data Visualization, Data Prediction, and Data transformation using NLP and LLM.
- Developed a AI based product suggestion chatbot for Mcaffeine, and Norfolk Wine and Spirits.

Projects

Voice Cloning Project | *Python, PyTorch, RVC Framework*

August 2024

- Replicated voices via RVC framework (5-sec samples) using HuBERT/FAISS.
- Automated preprocessing (Librosa), deployed on AWS Lambda. 95 percent similarity, 2-sec inference.

3D Face Reconstruction | *Python, DECA, Flask*

November 2023

- Generated 3D meshes from images via DECA. OpenCV/Dlib landmarks + PyRender visualization.
- 60 percent faster on TPUs, Flask API for user uploads.

Synthetic Lipsync | *Python, OpenCV, AWS EC2*

October 2023

- Synced lip movements to audio via Wav2Lip. OpenCV/FFmpeg preprocessing.
- 89 percent accuracy, 24 FPS real-time. Batch AWS EC2 processing.

Technical Skills

Languages: Python, R, SQL

ML/DL: Machine Learning, NLP, Computer Vision, Reinforcement Learning, Transformers, LLMs

Frameworks: TensorFlow, PyTorch, Scikit-Learn, Stable Diffusion, RAG

Tools: VS Code, Pycharm, AWS/Azure/GCP, OpenCV, PowerBI, Tableau, VectorDB (ChromaDB, FAISS, Pinecone)

Generative AI: GANs, VAEs, WAV2LIP, RVC
